CT Clean Energy Fund (CEEF) recognizes the need to make existing residential dwellings energy efficient prior to investing in renewable energy. As of March 1, 2010, participants in CCEF's residential rebate program are required to participate in the CCEF HES program.

Applicants will need to attest an energy audit has been performed in the past three (3) years.

If an energy audit has not been performed within the past three years, applicants may register for the HES program via www.ctenergyinfo.com or by calling 1-877-WISE-USE (1-877-947-3873).

Currently, HES is responding to requests within two weeks. In the event a residential customer does not receive a response within two weeks, please contact David Goldberg, CCEF Strategic Initiatives Director, directly at (860) 257-2889 for assistance.
