Woodstock E-Waste Event: A Great CT Clean Energy Options Sign-up Success!!

Woodstock Connecticut recently hosted an eWaste event at town hall. It was a great success as many local residents dropped off their old electronics in support of our ZERO Land-fill effort to keep these hazzardous materials out of our land-fills.

Not only did residents keep e-waste from contaminating water and soil but more than 20 residents enrolled for the CTCleanEnergyOptions green option on their CL&P bill by signing up at this event!

Jim Stratos (left) of the Woodstock Green Team and David Hussong (right) of the Pomfret Green Team educate residents about green energy and environmental stewardship. Photo Credit: Judy Walberg (town clerk and Woodstock Green Team member)

This event did a great job to raise awareness. In the days following the event almost 20 more Woodstock residents have enrolled for CTCleanEnergyOptions online! Woodstock Connecticut is a green leader, and the first town in the state to purchase 100% clean energy.
