SOLAR ELECTRIC SYSTEM INSTALLED AT MIDDLETOWN HIGH SCHOOL

Rocky Hill — The Connecticut Clean Energy Fund (CCEF), Connecticut Department of Public Utility Control and City of Middletown recently unveiled a two-kilowatt solar photovoltaic (PV) system installed at the Vocational Agriculture Building at Middletown High School. Middletown was the first Connecticut community to qualify for a CCEF-provided solar PV system. Ron Klattenberg, councilman for Middletown, said, "The new solar panels on our Vocational Agriculture Building will raise community awareness for the importance of this technology, help to serve our energy needs and become a great educational tool for high school students."
